

There is hope to start again with a **FREE SUPPLY OF MEDICATION**

What is Healthy Reentry?

Healthy Reentry is a collaborative partnership between Rx Outreach, Healthcare Systems, and Rehabilitative Communities to provide bridge medications to men and women transitioning from incarceration back into the community.

Since Rx Outreach separated from Express Scripts in 2010 to become an independent non-profit, we have been providing medication to people in need.

By becoming a collaborative partner with us in Healthy Reentry and helping providing medications for mental and physical illness, together we'll create healthier and safer communities, reducing common risk factors that increase recidivism.

What is the purpose of Healthy Reentry?

Healthy Reentry seeks to strengthen healthcare networks for individuals in transition by providing access to prescription medications and linkages to healthcare providers at no cost to the individual.

Why Healthy Reentry?

By providing medications for mental and physical illness, we help create healthier people and safer communities, reducing common risk factors that increase recidivism.
